The stocks shown here are personal **opinions and observations** — noted from tickers that viewers asked about during The 10 Minute Trader live stream on the date and time listed at the top of this document. The host is **not a licensed financial advisor, broker, or investment professional**, and nothing here is financial, investment, tax, or legal advice, nor a recommendation to buy or sell any security. These are simply observations applied to a **simple covered-call strategy he created** — one designed to be easy enough for a nine-year-old to follow — and which he shares **for free**. Options and stock trading involve substantial risk, including the possible loss of your entire investment. All figures shown are for the moment they were captured and are **not guarantees of future results**; prices, dividends, and option values change constantly. Always do your own research and consult a licensed financial professional before making any investment decision. You alone are responsible for your own trades.
